

Just what happens to the Food and Yard waste we separate out from our trash? Rick Grossman will coordinate a tour of Cedar Grove in Everett. Carpooling is recommended as are shoes you might wear in the garden.

This is not a smelly tour. It is a wonderful example of recycling. They may even give a discount on mulch, compost and other products.

The tour will probably be in May. It will include a walk though the yard which may be like walking in the arboretum, and then tie in a presentation in a small classroom overlooking the facility. It is not fully accessible, but not a long walk. Any questions? Call Rick at 848 702-1018.
